Logic Puzzle: Ministering Visits

Alma and his sons wanted to make some visits. There were four people in four places they wanted to visit on four days. Each family member could visit one person in one place on one day.

- One person visited (and only one) has the same initial as the place they live.
- Alma was available to visit only before Ammonihah was visited.
- Helaman either visited Zarahemla or saw Omner, not both.
- Zarahemla was visited by Helaman or Corianton.
- Shiblon visited on Wednesday or Friday. He didn't go to Jershon nor Gideon and didn't see Amulek.
- Hagoth was visited on Tuesday or Friday.
- Gideon isn't where Hagoth lives, and it wasn't visited on Wednesday or Thursday.
- Helaman went on his visit right after the person who visited Ammonihah.
- Jershon was visited either on Friday or by Alma.
- Amulek and Zeezrom were visited on consecutive days.

Use the chart (top right) to keep track of who saw whom when and where. Write your answers in the table below.
