

You Already Know It

You've been looking
For the answers
To a thousand questions
And you wonder
What the truth is
Trying to fill the spaces
Slowly losing all your hope
Not quite sure which way to go
But you don't know

Chorus:

You already know it
You don't have to fight what's in your heart
You already know it
It's a part of who you are
So stand there strong like you belong
Cause heaven knows you do
You don't have to know everything
To know that you believe

You remember
what it felt like
When you first believed it
It was more than
Just a feeling
You could almost see it
So doubt your doubts before your faith
And watch your fears melt away
You can say

Chorus

You already know it

Chorus

To know that you believe
